## Safe and Sustainable **Mobility**

VBP20D  
**Modular** bicycle rack for 20 bicycles, expandable.  
 pg. 04

## WE OFFER TECHNICAL ADVICE FROM THE BEGINNING OF THE PROJECT

### Traffic Calming

Designing the city for people involves rethinking how we coexist with vehicles in public spaces.

### Cycle Lanes

Bicycle mobility, healthier and more sustainable, is only possible if we have the appropriate infrastructure.

### Low Emission Zones

Living in healthy environments becomes increasingly feasible every day thanks to new initiatives aimed at reducing the emission of polluting gases in urban areas.

## BENITO APP

With BENITO's parking management application, you will ensure the security of the equipment by keeping a rigorous record of all users who use the parking. The application is free, very intuitive, and compatible with all existing management platforms, in case it needs to be integrated into software that is already being used.
